
Agenda for the deliberations by the Policy & Regulatory Committee (to consider submissions and make recommendations on the Trade Waste and Wastewater Bylaw) to be held in Council Chambers, District Office, 15 Galileo Street, Ngaruawahia on **MONDAY, 1 MAY 2023** commencing at **9:30am**.

1. APOLOGIES AND LEAVE OF ABSENCE

2. CONFIRMATION OF STATUS OF AGENDA

3. DISCLOSURES OF INTEREST

4. REPORTS

- 4.1 Deliberations and Recommendations for the Trade Waste and Wastewater Bylaw

5

5. EXCLUSION OF THE PUBLIC

It is intended to discuss this matter in the open section of the meeting, however, should in depth legal advice be requested from the Committee a resolution may be passed to exclude the public to hold these discussions.

GJ Ion
CHIEF EXECUTIVE

Policy & Regulatory Committee

Reports to:	Council
Chairperson:	Deputy Mayor Carolyn Eyre
Deputy Chairperson:	Cr Crystal Beavis
Membership:	The Mayor and all Councillors
Meeting frequency:	Six-weekly
Quorum:	Majority of the members (including vacancies)

Purpose

The Policy & Regulatory Committee is responsible for the Council's governance policies and bylaws and reviewing the District Plan.

In addition to the common delegations on page 10, the Policy & Regulatory Committee is delegated the following Terms of Reference and powers:

Terms of Reference:

1. To establish, implement and review the governance policy framework that will assist in achieving the Council's strategic priorities and outcomes.
2. To develop, review and approve Council bylaws for consultation.
3. To consider and determine changes to the schedules and parking restrictions in the Public Places Bylaw 2016, including hearing any submissions relating to those proposed changes.
4. To hear and determine matters arising under current bylaws, including applications for dispensation from compliance with the requirements of bylaws, unless such matters are otherwise delegated by Council.
5. To administer the Council's District Plan in accordance with the Resource Management Act 1991.
6. To monitor the performance of regulatory decision-making by the District Licensing Committee¹, Regulatory Subcommittee and officers under their respective delegations.

¹ For clarity, the District Licensing Committee is a committee of Council under the Sale and Supply of Alcohol Act 2012.

The Committee is delegated the following powers to act:

Governance Policies

- Develop and agree governance policies for the purpose of consultation/engagement.
- Recommend to Council policy for adoption, amendment, or revocation.
- Monitor and review policy, including recommending amendments to any policy as and when required.

Bylaws

- Determine all preliminary matters in relation to bylaws, except where expressly reserved for Council under legislation or the bylaw itself. For clarity, this delegation includes those matters to be determined under section 155 Local Government Act 2002.
- Develop and approve the statement of proposal and associated documentation for new or amended bylaws for consultation.
- Make any resolution where in a bylaw the Council has specified that a matter be regulated, controlled or prohibited by the Council by resolution.
- Recommend to Council new or amended bylaws for adoption.

District Plan

- Review and approve for notification a proposed district plan, a proposed change to the District Plan, or a variation to a proposed plan or proposed plan change (excluding any plan change notified under clause 25(2)(a), Schedule 1 of the Resource Management Act 1991)
- Withdraw a proposed plan or plan change under clause 8D, Schedule 1 of the Resource Management Act 1991.
- Make the following decisions to facilitate the administration of plan changes, variations, designation and heritage order processes:
 - a. To decide whether a decision of a Requiring Authority or Heritage Protection Authority will be appealed to the Environment Court by the Council and authorise the resolution of any such appeal, provided such decisions are consistent with professional advice.
 - b. To consider and approve Council submissions on a proposed plan, plan changes, and variations, unless expressly delegated to another decision-making body.
 - c. To monitor the private plan change process.
 - d. To accept, adopt or reject private plan change applications under clause 25, Schedule 1, Resource Management Act 1991.

Other Resource Management Issues

- Pursuant to Section 34(1) of the Resource Management Act 1991, to exercise all of the Council's functions, powers, and duties under that Act, except the functions, powers and duties:
 - a. that cannot be delegated or that are otherwise retained by the Council under its terms of reference; or
 - b. expressly delegated to other Council committees or decision-making bodies, or officers.
- Monitor and approve submissions in relation to National Policy Statements and National Environmental Standards.

Other Delegations

- Exercise all the Council's functions, powers and duties under the Building Act 2004, the Health Act 1956, the Dog Control Act 1996, and the Food Act 2014, and the respective regulations made under these Acts, except the functions, powers, and duties:
 - a. that cannot be delegated or that are otherwise retained by the Council under its terms of reference; or
 - b. expressly delegated to other Council committees or decision-making bodies, or officers.
- Approval of attendance of elected members at conferences, seminars, training, or events, in accordance with Council policy.

To	Policy and Regulatory Committee
Report title	Deliberations and Recommendation to adopt the Trade Waste and Wastewater Bylaw 2023
Date:	1 May 2023
Report Author:	Jodi Bell-Wymer, Corporate Planner
Authorised by:	Megan May, General Manager, Service Delivery

1. Purpose of the report

Te Take moo te puurongo

To assist the Policy and Regulatory Committee with deliberations on the proposed Trade Waste and Wastewater Bylaw 2023 and seek the Committee's approval to recommend the Bylaw to Council for adoption.

2. Executive summary

Whakaraapopototanga matua

The proposed Trade Waste and Wastewater Bylaw (Bylaw) was approved for consultation by the Policy and Regulatory Committee (Committee) on 12 September and was consultation occurred between 21 September and 21 November 2022. A total of 14 submissions were received, with two submitters speaking at the hearing on 22 February 2023.

Deliberations followed the hearing, with the Committee agreeing to a number of changes, and allowing staff more time to work on the mortuary waste definitions and clause. This report provides three options to the Committee in section 5.1 of this report.

Staff recommend that, subject to any amendments directed by the Committee as a result of the deliberations, the proposed Bylaw is recommended by the Committee to be adopted by Council at their 07 June 2023 meeting.

3. Staff recommendations **Tuutohu-aa-kaimahi**

That the Policy and Regulatory Committee:

- a. notes the changes that have been made to the proposed Trade Waste and Wastewater Bylaw as a result of the first deliberations held on 22 February 2023;**
- b. recommends an option from section 5.1 of the report with or without amendments; and**
- c. recommends that Council revoke the Trade Waste and Wastewater Bylaw 2016 and adopt the Trade Waste and Wastewater Bylaw 2023.**

4. Background **Koorero whaimaarama**

The Waikato District Council Trade Waste and Wastewater Bylaw 2016 (2016 Bylaw) was due for review on 01 October 2021. The 2016 Bylaw continues to have legal effect under section 160A of the Local Government Act 2002 (Act) until it is automatically revoked on 1 October 2023 or replaced sooner. By replacing the 2016 Bylaw with a new bylaw, Council can continue to regulate trade waste and wastewater discharges into the public wastewater network.

A workshop with Council was held on 3 May 2022, followed by early engagement. Early engagement submissions helped shape the draft Bylaw for formal consultation, which included a question on making mortuary waste a prohibited waste to align with Te Ao Maaori, Te Ture Whaimana and the principles of Te Mana o te Wai.

Consultation was open for two months as per section 148(2) requirements from 21 September 2022 and closed on 21 November 2022. A total of 14 submissions were received.

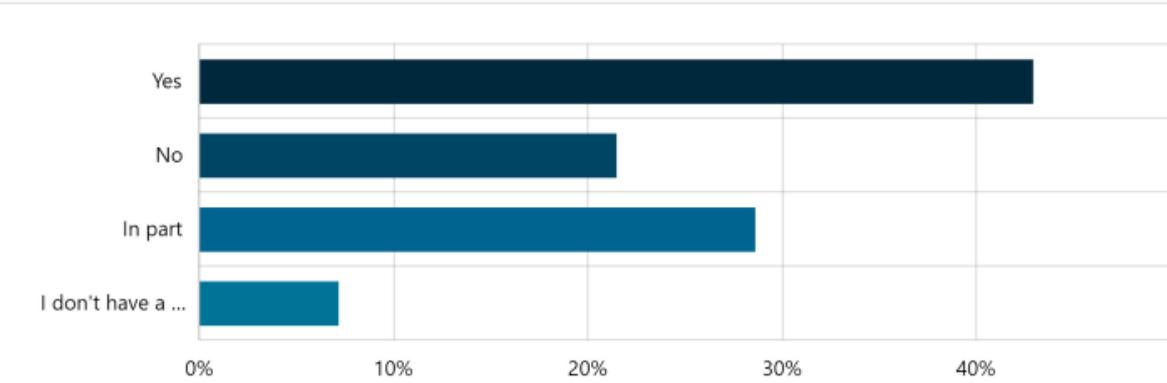

The consultation questions were split into three subject areas: wastewater, trade waste and mortuary waste. Submitters could answer all sections or only the areas they were interested in providing feedback for. At the first deliberations the trade waste and wastewater clauses were decided on and the mortuary waste clauses were deferred.

Mortuary Waste

Submitters were asked if they supported mortuary waste separation from the public reticulated wastewater system as a prohibited waste. Thirteen submitters answered with six indicating support for the changes, four supporting the change in part and three submitters not supporting the change.

11. Do you support the proposal to separate Mortuary waste from the public wastewater system? Required

Multi Choice | Skipped: 0 | Answered: 14 (100%)

Answer choices	Percent	Count
Yes	42.86%	6
No	21.43%	3
In part	28.57%	4
I don't have a response for this section	7.14%	1
Total	100.00%	14

The comments varied from highly in support of the proposal aligning with Te Ao Maaori to some comments made about not understanding the difference between human excretions and mortuary waste.

The 22 February 2023 Trade Waste and Wastewater [hearings report](#) includes attachments of all submissions received and submission points with staff comments.

Two submitters attended the hearing and spoke to their submissions. The first was Haven Funeral Services Huntly, who discussed the embalming process in detail and the method and products used. They were not quite sure on the cultural beliefs but are concerned that changing the way mortuary waste is disposed of would add cost to the process, which would have to be passed on to customers. They do have Maaori clientele, but the majority of their clients are non-Maaori, and in regard to requiring land disposal the submitter believed it would be hard to find land to dispose of the mortuary waste. The submitter believes the Council needs to be careful and find out exactly what Iwi and Hapu want.

The second speaker was from Sincere Funerals Ngaruawahia, who elaborated on her comments about being in support of ceasing discharging to the river and discussed possible practices. The comments are summarised below;

Not every deceased person's whanau will embalm, which means there is no waste fluid and the process is simple and much cheaper, and a lot more Maaori are taking that option. They have a lot of Maaori business due to being able to follow tikanga. They are investigating alternative options and want to be able to provide a Maaori service in Ngaruawahia.

In her opinion, the biggest issue here is disposal of the toto (blood). They have placed toto in with the tuupaapaku on request and are looking into applying that practice more. Toto will be placed in biodegradable vessels to be buried or cremated with deceased. As it is part of tikanga, they can't envisage any issues with it for Maaori whanau.

The submitter believes that working with non-Maaori whanau is about educating them and addressing concerns. They want to work with stakeholders to "revolutionise the way it is done".

During deliberations, the Committee gave direction to staff to gather more information and look further into the mortuary waste options to decide if the clauses are to be amended or removed from the Bylaw. Disposal methods were debated, and staff advised that at that time, investigation into how they could be managed had not been looked at in detail, as including mortuary waste as a prohibited waste needed to be decided first, noting that clause 2.3 says:

This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste:

(a) clauses 8.3 and,

(b) the definitions relating to mortuary waste contained in clause 6.

Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.

5. Discussion and analysis

Taataritanga me ngaa tohutohu

Staff made changes to the Bylaw as recommended during deliberations, with the majority being grammatical. These are minor amendments that can be seen in Attachment One.

A meeting was held with Waikato-Tainui to obtain comment on the proposed mortuary waste clauses as suggested by the Committee Chair. Waikato-Tainui staff supported prohibiting the disposal of mortuary waste to the reticulated system and ultimately the Waikato River as it aligned with tikanga and Te Ture Whaimana. The Waikato River is a tupuna (ancestor), a taonga (treasure), and the mauri (life force) of Tainui Waka.

During the meeting, the Waikato-Tainui staff present were not able to provide information on appropriate disposal methods or what materials are considered tapu through the embalming process. They would like to work with Council to determine the tikanga that should be applied to managing mortuary waste should it become a prohibited waste in the Bylaw.

Council staff also met with the president of the New Zealand embalming association. This meeting was to discuss any industry standards and new methods available and to gauge what the impacts could be on costs as raised by one of the submitters at the hearing. Comments made at the meeting included seeing a change with some establishments already preparing more environmentally friendly waste disposal methods. A comment was made about cultural preferences, and they spoke of some families requesting the toto of their loved ones to be buried with them – not just Maaori but other ethnicities too.

A discussion took place with legal staff to determine if amending the clauses to be more inclusive were within the scope of the consultation and therefore able to be considered as an option. Legal staff approved the options discussed below and advised that the intent of the Bylaw clauses was not changing, and the preferred option considers the submissions received.

5.1 Options

Ngaa koowhiringa

Staff have assessed that there are three reasonable and viable options for the Committee to consider. This assessment reflects the level of significance (see paragraph 6.1). The options are set out in the table below;

Option one:

Option one considers the majority of submitter feedback who want mortuary waste to be removed from the reticulated wastewater system and emphasises the use of clause 2.3 that implements mortuary waste clauses at a later date.

The clauses and definitions are kept open to provide for future collaboration with the Council, Waikato-Tainui, mana whenua and stakeholders. It makes a commitment to uphold Te Ture Whaimana and values tikanga Maaori.

This is the preferred option of Staff.

Definition	Draft Bylaw	Proposed amendment
Mortuary Waste	Means the trade waste from any process involving physical contact with a deceased person at a mortuary.	The definition of mortuary waste will be determined on the same Council resolution date as per section 2.3
Mortuary Waste Disposal Site	Means a site designated by the Council as a mortuary waste disposal site	Remove definition
2.3	<p>This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste:</p> <p>(a) clauses 8.3 and,</p> <p>(b) paragraph (b) the definition of prohibited waste contained in clause 6.</p> <p>Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.</p>	<p>This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste:</p> <p>(a) clauses 8.3 and,</p> <p>(b) The definitions relating to mortuary waste contained in clause 6.</p> <p>Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.</p>

Clause	Draft Bylaw	Proposed amendment
8.3	Trade waste from a mortuary shall only be disposed of to a site approved by the Council as a mortuary waste disposal site.	Trade waste from a mortuary shall only be disposed of in a manner approved by the Council. <i>Advisory note: Acceptable disposal methods may be prescribed through a guideline document or by the addition of a schedule two to this Bylaw</i>

Option two:

Option two is more specific in what mortuary waste includes (not washdown water or human waste products). It is specific to embalming fluid and toto/blood as discussed in the hearing. It is more descriptive on what happens to the biohazardous material and shows that there are cost effective methods rather than disposing to the reticulated system or requiring the installation of large holding tanks.

This option is not recommended by Staff as it does not consider the requirement for land disposal or flexibility on the meaning of mortuary waste that Waikato-Tainui and mana whenua may want to have input into.

Definition	Draft Bylaw	Proposed amendment
Mortuary Waste	Means the trade waste from any process involving physical contact with a deceased person at a mortuary.	Means embalming fluids and the toto (blood) of a deceased person at a mortuary (does not include human waste product)
Mortuary Waste Disposal Site	Means a site designated by the Council as a mortuary waste disposal site.	Remove definition
2.3	This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste: (a) clauses 8.3 and, (b) paragraph (b) the definition of prohibited waste contained in clause 6. Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.	This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste: (a) clauses 8.3 and, (b) The definitions relating to mortuary waste in clause 6 Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.

Clause	Draft Bylaw	Proposed amendment
8.3	Trade waste from a mortuary shall only be disposed of to a site approved by the Council as a mortuary waste disposal site.	Trade waste from a mortuary shall only be disposed of using a certified biohazardous waste removal service or remain with the deceased person.

Option three:

Remove all proposed mortuary waste clauses from the Bylaw. This is a simple option and does not commit the Council to continue working on the mortuary clauses.

Staff do not recommend this option as it does not align with the consultation material and Te Ture Whaimana.

Definition	Draft Bylaw	Proposed amendment
Mortuary Waste	Means the trade waste from any process involving physical contact with a deceased person at a mortuary.	Remove definition
Mortuary Waste Disposal Site	Means a site designated by the Council as a mortuary waste disposal site	Remove definition

Clause	Draft Bylaw	Proposed amendment
2.3	This Bylaw shall come into force on (TBC), except for the following clauses which relate to mortuary waste: (a) clauses 8.3 and, (b) paragraph (b) the definition of prohibited waste contained in clause 6. Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.	Remove clause
8.3	Trade waste from a mortuary shall only be disposed of to a site approved by the Council as a mortuary waste disposal site.	Remove clause

5.2 Financial considerations

Whaiwhakaaro puutea

The options in this report do not have any immediate financial impact or considerations, noting that should options 1 or 2 be chosen, future costs may require assessment and analysis by Staff and be required to be presented to Council. Such costs may include acquiring land for mortuary waste disposal or working with existing wastewater disposal entities to assist affected businesses.

5.3 Legal considerations

Whaiwhakaaro-aa-ture

Staff confirm that the staff recommendation complies with the Council's legal and policy requirements. Consultation on the bylaws occurred under section 83 of the Local Government Act 2002.

5.3 Strategy and policy considerations

Whaiwhakaaro whakamaaherehere kaupapa here

The proposed Bylaw incorporates Te Ture Whaimana – The vision and strategy for the Waikato River. Te Ture Whaimana is the primary direction-setting document for the restoration and protection of the Waikato and Waipaa Rivers. There are no other policies and strategies that staff consider affected by the Proposed Bylaw.

5.4 Maaori and cultural considerations

Whaiwhakaaro Maaori me oona tikanga

Council have considered Maaori tikanga (values) regarding the tapu (sacredness) of tuupaapaku (deceased) and mortuary waste and how it should be kept separate from the Waikato River.

If the mortuary waste disposal clauses are adopted into the Bylaw, collaboration with Waikato- Tainui and mana whenua will be undertaken by staff to determine appropriate disposal methods.

5.5 Climate response and resilience considerations

Whaiwhakaaro-aa-taiao

The matters in this report have no known impact on climate change or resilience for the Council.

5.6 Risks

Tuuraru

A significant risk for Council is that the Trade Waste and Wastewater Bylaw will be automatically revoked on 01 October 2023 and should the proposed bylaw not be adopted, this Council would be without any legislation managing the matters contained within the bylaw.

6. Significance and engagement assessment

Aromatawai paahekoheko

6.1 Significance

Te Hiranga

The decisions and matters of this report are assessed as of medium significance, in accordance with the Council's Significance and Engagement Policy.

6.2 Engagement

Te Whakatuutakitaki

Highest level of engagement	Inform <input type="checkbox"/>	Consult <input checked="" type="checkbox"/>	Involve <input type="checkbox"/>	Collaborate <input type="checkbox"/>	Empower <input type="checkbox"/>
<i>Tick the appropriate box/boxes and specify what it involves by providing a brief explanation of the tools which will be used to engage (refer to the project engagement plan if applicable).</i>	The community, mana whenua and stakeholders were consulted in accordance with section 83 of the Local Government Act 2002.				

State below which external stakeholders have been or will be engaged with:

Planned	In Progress	Complete	
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Internal
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Community Boards/Community Committees
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Waikato-Tainui/Local iwi and hapuu
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Affected Communities
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Affected Businesses

7. Next steps Ahu whakamua

Following direction from the Policy and Regulatory Committee, the bylaw will be recommended to the Council on 07 June 2023 for adoption. The final stages of the consultation process will occur including emailing submitters to advise them of Council's decision, releasing a public statement on Council's Facebook page and website and issuing a public notice of adoption.

Should the preferred option 1 be selected by the Committee, staff will continue to work closely with mana whenua and stakeholders on the mortuary waste clauses and implementation.

8. Confirmation of statutory compliance Te Whakatuuturutanga aa-ture

As required by the Local Government Act 2002, staff confirm the following:

The report fits with Council's role and Committee's Terms of Reference and Delegations.	Confirmed
The report contains sufficient information about all reasonably practicable options identified and assessed in terms of their advantages and disadvantages (<i>Section 5.1</i>).	Confirmed
Staff assessment of the level of significance of the issues in the report after consideration of the Council's Significance and Engagement Policy (<i>Section 6.1</i>).	Moderate
The report contains adequate consideration of the views and preferences of affected and interested persons taking account of any proposed or previous community engagement and assessed level of significance (<i>Section 6.2</i>).	Confirmed
The report considers impact on Maaori (<i>Section 5.5</i>)	Confirmed
The report and recommendations are consistent with Council's plans and policies (<i>Section 5.4</i>).	Confirmed
The report and recommendations comply with Council's legal duties and responsibilities (<i>Section 5.3</i>).	Confirmed

9. Attachments Ngaa taapirihanga

Attachment 1 – The proposed Trade Waste and Wastewater Bylaw 2023 (option one)

Waikato District Council

(Draft) Trade Waste and Wastewater Bylaw 2023

Waikato District Council, in exercise of its powers and authorities given to it under the Local Government Act 2002, and the Health Act 1956 and their respective amendments, and all other relevant powers, hereby makes the following Bylaw.

Part I: Preliminary Provisions

1. Introduction

- 1.1 Waikato District Council (the Council) has the ability to make bylaws for managing, regulating and protecting wastewater drainage and trade waste. Under Section 10 of the Local Government Act, the Council needs to provide effective and efficient wastewater infrastructure. The regulation of trade waste allows the Council to control the quality and quantity of trade waste and recover the additional costs of trade waste collection and treatment. The management of wastewater assists in protecting wastewater infrastructure from damage, removing substances that could affect the environment, and controlling stormwater discharges to the wastewater system.
- 1.2 Council has a duty under Section 17 of the Waikato River Settlement Act 2010, to have regard to Te Ture Whaimana o Te Awa o Waikato (the vision and strategy for the Waikato River). The vision is “for a future where a healthy Waikato River sustains abundant life and prosperous communities who, in turn, are all responsible for restoring and protecting the health and wellbeing of the Waikato River, and all it embraces, for generations to come”. In this regard, the Council recognises the special cultural, social, environmental and economic relationship of Waikato-Tainui with the Waikato River and the need to protect and restore the Waikato River.

Advisory Note: the above introduction does not form part of this Bylaw and is intended to be read as an introductory note.

2. Short title, commencement, and application

- 2.1 The Bylaw shall be known as the ‘Waikato District Council Trade Waste and Wastewater Bylaw 2023’.
- 2.2 The Bylaw shall apply to the Waikato District.
- 2.3 This Bylaw shall come into force on XXXX, except for the following clauses which relate to mortuary waste:
- (a) ~~Clauses 8(e) and (d); and 8.3 and,~~
 - (b) ~~Paragraph (d) of the definition of prohibited~~The definitions relating to ~~wastemortuary waste~~ contained in clause 6.

Any clauses which relate to mortuary waste shall come into force on a date determined by Council resolution.

3. Revocation

- 3.1 The following Bylaw is hereby revoked from the day this new Bylaw comes into force:
‘Waikato District Council Trade Waste and Wastewater Bylaw 2016.

4. Purpose

4.1 The purpose of this Bylaw is to enable the Council to:

- a) Protect the health and safety of people using or working in the Wastewater System.
- b) Protect the Wastewater System from damage and misuse.
- c) Protect the environment from adverse effects of harmful substances discharged to the Wastewater System.
- d) Produce Wastewater and Biosolids of a consistent quality.
- e) Encourage waste minimisation, cleaner production, efficient recycling and reuse of waste streams by businesses.
- f) Ensure that businesses maintain Trade Waste discharges within agreed levels.
- g) Ensure the Council meets its legal obligations and commitments, including (but not limited to):
 - i. The Waikato River Settlement Act 2010, in particular, the requirement that Council have regard to the Vision and Strategy for the Waikato River by contributing to the protection and restoration of the health and wellbeing of the Waikato River.

5. Compliance with Other Acts and Codes

- 5.1 This Bylaw has been developed in accordance with all relevant legislation, council policy and guidance documents.
- 5.2 Without limiting subclause (5.1), compliance with the requirements of this Bylaw does not remove the need to comply with the requirements of any act, regulation or other Bylaw.

6. Definitions

For the purposes of this Bylaw, the following definitions shall apply, unless inconsistent with the context:

Access Point	Means a place where access to a private drain is available for inspection (including sampling or measurement), cleaning or maintenance. The location of the access point must be in accordance with the New Zealand Building Code.
Alternative Grease Removal System	Refers to a grease removal system other than a grease trap and includes, but is not limited to, grease converters and mechanical grease removal systems.
Approval or Approved	Means an approval provided in writing by the Council, either by resolution of the Council or by any Authorised Officer of the Council.

Approval Notice	Means a notice of approval authorising a person to discharge permitted trade waste to the wastewater system.
Authorised Officer	Means any person authorised by the Council to carry out general or specific duties arising from any of the provisions of this Bylaw, unless stated otherwise.
Biosolids	Means wastewater sludge derived from a wastewater treatment plant that has been treated and/or stabilised to the extent that it is able to be safely and beneficially applied to land or reused and does not include products derived solely from industrial wastewater treatment plants. <i>Advisory note: The term "Biosolid" is used generically throughout the Bylaw to include products which contain biosolids (eg composts).</i>
Characteristics	Means any of the physical or chemical properties of a wastewater and may include the level of a characteristic.
Cleaner Production	Means the implementation and use on premises of effective operations, methods and processes appropriate to achieve the reduction or elimination of the quantity and toxicity of wastes.
Condensing or Cooling Water	Means any water used in any trade, industry, or commercial process or operation in such a manner that it does not take up matter into solution or suspension.
Conditional Consent	Means a consent granted by the Council authorising a person to discharge conditional trade waste to the wastewater system but subject to conditions.
Consent Holder	Means the person occupying premises who has obtained approval and includes any person who does any act on behalf or with the express or implied consent of the Consent Holder (whether for reward or not) and any licensee of the Consent Holder.
Council	Means Waikato District Council or any person authorized by Council to carry out duties relating to trade waste and wastewater management.
Defect Notice	Means a notice issued in accordance with clause 15.1.
Disconnection	Means the physical cutting and sealing of any of Council's water services, utilities, drains or wastewater system to prevent use by any person.
Domestic Wastewater	Means either wastewater which is discharged from premises used solely for residential activities or wastes of the same character discharged from other premises, if the characteristics of the wastewater are an acceptable discharge; but does not include any solids, liquids or gases that cannot lawfully be discharged into the wastewater system.
Grease Trap	Means a separation tank that reduces the amount of fat, oil and grease in trade waste prior to it being discharged into the wastewater system.
Hazardous Materials	Means raw materials, products or wastes containing corrosive, toxic, biocidal, radioactive, flammable or explosive materials, or any materials which when mixed with wastewater, are likely to generate toxic, flammable, explosive or corrosive materials in quantities likely to be hazardous to the health and safety of any Person or harmful to the wastewater system, and includes hazardous substances as defined by the Hazardous Substances and New Organisms Act 1996.
Independently Qualified Person	Means a person with appropriate qualifications, approved by the Council and who is independent of the consent holder.

Infiltration	Means ground or surface water entering the wastewater system or a private drain connected to the wastewater system through defects such as, but not limited to, poor joints and cracks in pipes or manholes. It does not include Inflow.
Inflow	Means water discharged into the wastewater system or a private drain connected to the wastewater system from non-complying connections. It includes stormwater entering through illegal down pipe connections or from low gully traps.
Management Plan	Means a plan which shows how the consent holder will manage their operations and discharge to comply with their consent. It may include provision for flow and quality monitoring, sampling and testing, cleaner production, waste minimisation, discharge, contingency management procedures, or any relevant industry code of practice.
Mass Limit	Means the total mass of any characteristic that may be discharged to the wastewater system over any stated period from any single point of discharge or collectively from several points of discharge.
Maximum Concentration	Means the instantaneous peak concentration that may be discharged at any instant in time.
Mortuary	Means a premises used, or intended to be used, for the preparation of dead bodies for burial or for the embalming of deceased bodies or the examination or treatment of deceased bodies prior to burial; but does not include premises so used or intended to be used primarily for hospital care within a hospital care institution (within the meaning of section 58(4) of the Health and Disability Services (Safety) Act 2001).
Mortuary Waste	The definition of mortuary waste will be determined on the same Council resolution date as per section 2.3 Means the trade waste from any process involving physical contact with a deceased person at a mortuary.
Mortuary Waste Disposal Site	Means a site designated by the Council as a mortuary waste disposal site.
Occupier	Means the person occupying premises connected to the wastewater system.
Permitted Trade Waste	Means a trade waste discharge that complies with the physical and chemical characteristics defined in Schedule 1A of this Bylaw.
Person	Includes a corporation sole and also a body of persons whether incorporated or unincorporated.
Point of Discharge	Means the boundary between the wastewater system and a private drain. however, for the purposes of monitoring, sampling and testing, any point of discharge must be in the area.
Pre -Treatment	Means any processing of trade waste designed to reduce or vary any characteristic in a waste before discharge to the wastewater system in order to comply with a consent or this Bylaw.
Private Drain	Means that section of drain between the premises and the point of connection to the wastewater system.
Premises	Means: <ol style="list-style-type: none"> a) A property or allotment which is held under a separate certificate of title or for which a separate certificate of title may be issued; b) A building or part of a building that has been defined as an individual unit by a cross-lease, unit title or company lease; c) Land held in public ownership for a particular purpose; or

- d) Individual units in buildings, which are separately leased or separately occupied.

Allotment means the same as defined in the Land Transfer Act 1952.

Prohibited Trade Waste

Means a trade waste discharge that has any of the prohibited characteristics as defined in Schedule 1B of this Bylaw.

Stormwater

Means surface water runoff that:

- a) Enters or may enter the stormwater system as a result of a rain event; and
- b) Contains any substance where the type and concentration of the substance is consistent with the contributing catchments land use(s) and that of the receiving environment.

Tankered Waste

Is water or other liquid, including waste matter in solution or suspension, which is conveyed by vehicle for disposal, excluding domestic wastewater discharged directly from house buses, caravans, buses and similar vehicles.

Temporary Discharge

Means any discharge of an intermittent or short duration. Such discharges include the short-term discharge of waste from premises subject to an existing consent.

Trade Waste

Is any liquid, with or without matter in suspension or solution, that is or may be discharged from a premises to the wastewater system in the course of any trade or industrial process or operation, or in the course of any activity or operation of a like nature; and may include Condensing or Cooling Waters; or Stormwater which cannot be practically separated.

Trade Waste Agreement

Is a written agreement between council and a person, authorising the person to discharge conditional trade waste to the wastewater system, that outlines both parties' rights and responsibilities.

Wastewater

Means water or other liquid waste, including sewage and waste matter in solution or suspension, discharged to the wastewater system. This includes domestic wastewater and trade wastes.

Wastewater System

Includes all infrastructure, including pipes, fittings, manholes, pumps, pump stations; and any land, buildings, and treatment works which are under the control of the Council or any other Council and used for the purpose of providing a wastewater service.

Wastewater Treatment Plant

Means the processes and facilities involved in treating wastewater.

Working Day

- a) Has the same meaning as contained in the Legislation Act 2019.

Part 2: Wastewater

7. Wastewater

7.1 Connecting to the Wastewater System

- a) No Person may, without Council's approval
 - i. Connect to the Wastewater System;
 - ii. Disconnect from the Wastewater System;
 - iii. Carry out any other works on, or in relation to, the Wastewater System; or
 - iv. Open any manhole, chamber, Access Point on, or otherwise tamper with the Wastewater System.
- b) The Council may grant approval to such connection, disconnection or other works, and may impose conditions.
- c) Any application for approval must be made in writing on the prescribed form and be accompanied by all information relating to the application as required by the Council.
- d) Only the Council is to install low pressure wastewater connections to the property boundary.
- e) All standard gravity wastewater connections are to be carried out by owner or other person and must ensure prior to any wastewater connection, disconnection, or other works:
 - i. that works are carried out by a qualified contractor/drainlayer holding the current NZ Certificate in Infrastructure Works,
 - ii. obtain Council approved consent or engineer plan and provide information specific by Council or Authorised Officer,
 - iii. Installation completed to meet Regional Infrastructure Technical Specifications (RITS).
- f) Without limiting subclause (b), any condition imposed by Council in relation to such approval may require that the connection, disconnection or works comply with any relevant code of practice.
- g) Council may refuse any application for Approval to connect to a system where:
 - i. The applicant has not paid fees or charges associated with the connection (including development charges) or has refused to provide Council with specified information relating to the application;
 - ii. In Council's reasonable opinion, there is insufficient capacity in the system to accommodate the connection;
 - iii. In Council's reasonable opinion, the connection would compromise its ability to maintain levels of service in relation to the Wastewater System;
 - iv. The connection is outside the area currently served by the Wastewater System, regardless of its proximity to any specific component of the Wastewater System; or
 - v. In Council's reasonable opinion, refusal is necessary to protect the Wastewater System, the health and safety of any Person, or the environment.

7.2 Control of Discharges

- a) A Person must not discharge or allow to be discharged, any wastewater into the Wastewater System except in accordance with this Bylaw and with the provisions of a

consent or trade waste agreement.

- b) No Person may introduce or discharge or allow to be introduced or discharged wastewater that has any of the prohibited Characteristics set out in Schedule 1B into the wastewater system.
- c) No person may cause or allow stormwater to enter the wastewater system unless specific Approval is given.
- d) No Person may introduce or discharge Condensing water, Cooling water, disinfected or super-chlorinated water into the Wastewater System unless specific Approval is given.

Advisory note: condensing, cooling, disinfected or super-chlorinated water must not be discharged to the Stormwater system without specific Approval.

- e) When any Person fails to comply with clauses 7.2 (a) – (d), and a reasonable alternative method cannot be agreed with the discharging party, the Council may physically prevent discharge into the Wastewater System.
- f) Domestic wastewater must comply with the physical and chemical Characteristics in Schedule 1A.
- g) The maximum instantaneous flow rate discharged from any Premises solely used for residential purposes must not exceed 2.0 litres/second.

7.3 Wastewater Service Areas

- a) Council may define the service area and make information relating to the service area and availability of connection publicly available on the Council website.

7.4 Hazardous Materials

- a) A person must take all practicable steps to store, handle, transport and use hazardous materials in a way that prevents wastewater with prohibited characteristics as described in Schedule 1B entering the Wastewater System.
- b) Any person who knows of the entry or imminent entry of wastewater with prohibited Characteristics as set out in Schedule 1B to the Wastewater System must inform an Authorised Officer or the Council as soon as reasonably practicable.
- c) Any person who causes or allows the discharge of wastewater with prohibited characteristics as set out in Schedule 1B to the Wastewater System must:
 - i. Immediately take all practicable steps to stop the imminent entry or further entry of this wastewater to the Wastewater System; and
 - ii. Inform an Authorised Officer or the Council as soon as reasonably practicable.

7.5 Protection of Wastewater System

- a) No person may cause or allow to be caused any damage to, or modification, stoppage, or obstruction of, or interference with the Wastewater System, except with approval of the Council.
- b) Every person excavating or working around the Wastewater System must take due care to ensure that the work does not damage and/or compromise the integrity of the Wastewater System.
- c) Any Person who knows of any serious or substantial damage to the Wastewater System

must inform an Authorised Officer or the Council as soon as reasonably practicable.

- d) Any person who causes or allows any damage to the Wastewater System must inform an Authorised Officer or the Council as soon as reasonably practicable.
- e) No Person may place any additional material over or near a Wastewater System without Approval.
- f) No Person may cover an access point without approval. If any material covering an access point is required to be removed or an access point requires adjustment, such work will be at the property owner's expense.

7.6 Building Over or in near the Wastewater Network

- a) A person intending to do any building works over or within five meters of the public Wastewater System must:
 - (i) make an application to Council and not proceed with the works until such time as Approval is granted.
 - (ii) Ensure compliance with the approval and any conditions of the approval.
 - (iii) Ensure that the works comply with any requirements of the Regional Infrastructure Technical Specifications (RITS).
- b) In granting approval for an application to do building works over or near the wastewater network, the Council may include any conditions as it considers appropriate including a requirement to carry out or to permit Council to carry out (in either case at the expense of the person) works for the protection of the network.

7.7 Private Wastewater Systems

- a) Where it is identified that a private wastewater system is not operating effectively, Council may issue a notice to fix to require an owner or occupier of a property to fix the private wastewater system systems, including, at the owner's cost, to meet original design specifications.
- b) No person may cause or allow stormwater inflow or groundwater infiltration into the wastewater network or any private drain which is connected to the wastewater network, including:
 - i. No direct connection of any stormwater pipe or drain to the wastewater system;
 - ii. Gully trap surrounds are set above stormwater ponding levels (refer New Zealand Building Code G13), or secondary overland flow path flood levels;
 - iii. Inspection covers are in place and are appropriately sealed.
- c) An occupier or owner whose private drain is overflowing or has other reasons to suspect a blockage, must immediately call a drainlayer to clear and remove any blockage in the private drain, at the occupier or owner's expense. If the drainlayer considers that the blockage originates within the Wastewater System, then the drainlayer must contact the Council.
- d) Council may reimburse the owner of the Private Drain for the reasonable cost of unblocking work for which the owner has paid, provided that the Council is satisfied that:
 - i. The blockage originated in the Wastewater System;
 - ii. The blockage was not forced downstream into the Wastewater System in the act of clearing the private drain; and

- iii. The owner or occupier of the premises has not caused or permitted a discharge which does not comply with this Bylaw, a consent or a trade waste agreement.
- e) Where the roots of a tree which is on private land enter or are likely to enter the Wastewater System, Council will follow the procedure set out in s 468 of the Local Government Act 1974.
- f) A person with a pressure wastewater system, or any other system that is connected to the Wastewater System, must use that system in accordance with any operating manual or guidelines for that system.

7.8 Prohibited discharge

- a) No person may discharge or introduce prohibited waste into the wastewater network.
- b) For the purposes of the above clause, prohibited waste means:
 - Waste that has, or is likely to have, any of the prohibited characteristics set out in Schedule 1; and includes, but is not limited to non-dispersible items or waste such as Disposable wipes
 - Nappies and diapers
 - Sanitary products
 - Paper other than toilet or tissue paper
 - Fat and grease
 - Plants, wood and vegetation
 - Soil, rocks and stones
 - Fabric and material such as rags
 - Solid objects such as toys
 - Paint and solvents
 - Pharmaceutical products
 - Plastic bags

Part 3: Trade Waste

8. Trade Waste Discharges and Consents

8.1 Classification of Discharges

- a) Trade Waste discharges are classified as one of the following types:
 - i. Permitted Trade Waste, (in which case an Approval Notice must be obtained);
 - ii. Conditional Trade Waste, (in which case a Conditional Consent must be obtained or a Trade Waste Agreement be entered into); or
 - iii. Prohibited Trade Waste, (in which case no approval in any form will be granted).

8.2 Discharge of Trade Waste

- a) No Person may discharge or cause to be discharged trade waste into the Wastewater System except in accordance with approval from the Council (either through an Approval Notice, Conditional Consent or a Trade Waste Agreement).
- b) Council is not obliged to accept any trade waste.

8.3 Mortuary Waste

Trade waste from a mortuary shall only be disposed of ~~to a site~~ in a manner approved by the Council ~~as a mortuary waste disposal site.~~

Advisory note: Acceptable disposal methods may be prescribed through a guideline document or by the addition of a schedule two to this Bylaw.

Formatted: Font: Italic

8.4 Trade Waste Agreement

- a) An application for a Trade Waste Agreement may be made to the Council using the prescribed form.
- b) Council may, at any time and at its complete discretion, require an occupier to enter into a trade waste agreement for the discharge and reception of trade waste.
- c) Any such agreement may be made in addition to or in place of a Conditional Consent or a Trade Waste Agreement and its terms will have the same force as if the agreement was a consent issued under this Bylaw.
- d) A Trade Waste Agreement may be appropriate in circumstances where, in the reasonable opinion of Council, the discharge is considered to have:
 - i. Unique discharge characteristics.
 - ii. A volume or loading of any characteristic that may affect the operation of the wastewater system or treatment plant;
 - iii. Potential discharge of hazardous or prohibited substances;
 - iv. Pre-treatment systems;
 - v. The requirement for capacity to be reserved at the wastewater treatment plant;
 - vi. A history of non-compliance with a consent or trade waste agreement.
 - vii. Any other matter the Council may consider relevant.

8.5 Application for a Conditional Consent or Variation of Consent

- a) Every person who does, proposes to, or is likely to:
 - i. Discharge into the wastewater system, any trade waste either continuously, intermittently or temporarily;
 - ii. Vary the characteristics of a permitted trade waste discharge in a manner which may cause it to fail to meet the standards for a permitted trade waste;
 - iii. Vary the conditions of a Conditional Consent that has previously been granted; or
 - iv. Significantly change the method or means of pre-treatment for a trade waste discharge;

must apply to Council, using the prescribed form, for a Conditional Consent to discharge trade waste, or for the proposed variations.

- b) The council reserves the right to deal with the owner as well as the Occupier of any Premises.
- c) Where Trade Waste is produced from more than one area of the Premises, any application for Approval must include a separate description of the Trade Waste Characteristics for the proposed Trade Waste discharge for each area. This clause applies even if the separate areas are part of a single trade process.
- d) Any application must include all required information, be properly executed and accompanied by the application fee.

- e) Council may require an application to be supported by a report or statement from an Independently Qualified Person, to verify information supplied by the applicant.
- f) Any costs incurred in making the application or providing any required information are borne solely by the applicant.

8.6 Processing an Application for Approval

- a) On receipt of an application for an Approval Notice, Conditional Consent or Trade Waste Agreement, Council may:
 - i. Require the applicant to submit additional information which the Council considers necessary to reach an informed decision;
 - ii. Require the applicant to submit a satisfactory Management Plan to Council's satisfaction; and/or
 - iii. Wherever appropriate, have the discharge investigated and analysed as provided for at clauses 8.8 and 8.10 of this Bylaw at the applicant's cost.
- b) In considering any application for an Approval Notice, Conditional Consent, Trade Waste Agreement or variation, Council must consider the Characteristics, volume, and rate of discharge of the Trade Waste from such Premises or tanker and any other matter that it considers, on reasonable grounds, to be relevant, which may include:
 - i. The health and safety of Council staff, Council's agents and the public;
 - ii. The limits and/or maximum values for Characteristics of Trade Waste as specified in Schedules 1A and 1B of this Bylaw;
 - iii. The extent to which the Trade Waste may react with other Trade Waste or Wastewater to produce an undesirable effect, e.g. settlement of solids, production of odours, accelerated corrosion and deterioration of the Wastewater System, etc;
 - iv. The flows and velocities in the Wastewater System and the material or construction of the Wastewater System;
 - v. The capacity of the Wastewater System including the capacity of any Wastewater Treatment Plant, and other facilities;
 - vi. The nature of any wastewater treatment process and the degree to which the Trade Waste is capable of being treated in the Wastewater Treatment Plant;
 - vii. The timing and balancing of flows into the Wastewater System;
 - viii. Any statutory requirements relating to the discharge of raw or treated Wastewater to receiving waters, the disposal of Wastewater sludges, beneficial use of Biosolids, and any discharge to air. This includes compliance with any resource consent, discharge permit or water classification;
 - ix. The possibility of unscheduled, unexpected or accidental events and the degree of risk these could pose to humans, the Wastewater System or the environment;
 - x. Consideration of other existing or future discharges;
 - xi. Existing Pre-Treatment works on the Premises;
 - xii. The use of Cleaner Production techniques and waste minimisation practices;
 - xiii. Control of Stormwater;
 - xiv. Any Management Plan;
 - xv. Tankered Waste being discharged at an approved location/s; and
 - xvi. Whether it would be more appropriate for the discharge to be controlled pursuant to a Trade Waste Agreement.
- c) If Council considers an application is satisfactory, it will then:

- i. Issue an Approval Notice and inform the Consent Holder of the conditions imposed;
- ii. Grant a Conditional Consent and inform the Consent Holder of the conditions imposed;
- iii. Advise the applicant that Council is willing to enter into a Trade Waste Agreement on terms acceptable to Council; or
- iv. Decline the application and notify the applicant of the decision, giving a statement of the reasons for refusal.

8.7 Conditions of Conditional Consent, Trade Waste Agreement and Approval Notice

- a) Any consent may be granted subject to such conditions that the Council may impose, including, but not limited to:
 - i. Where the discharge will be made;
 - ii. The maximum daily volume of the discharge and the maximum rate of discharge, and the duration of maximum discharge;
 - iii. The maximum limit or permissible range of any specified Characteristics of the discharge, including concentrations and/or Mass Limits determined in accordance with clause 8.7 (b) of this Bylaw;
 - iv. The times during which the discharge, or a particular concentration, or volume of discharge may be made;
 - v. The provision by, or for the Consent Holder, at the Consent Holder's expense, of screens, Grease Traps, silt traps or other Pre-Treatment works to control Trade Waste discharge Characteristics to the consented levels;
 - vi. The provision and maintenance, at the Consent Holder's expense, of inspection chambers, manholes or other apparatus or devices to provide reasonable access to drains for sampling and inspection;
 - vii. The provision and maintenance of a sampling, analysis and testing programme and flow measurement, at the Consent Holder's expense;
 - viii. The method or methods to be used for measuring flow rates and/or volume and/or Characteristics and taking samples of the discharge for use in determining compliance with the consent and for determining the amount of any Trade Waste charges applicable to that discharge;
 - ix. The provision and maintenance by, and at the expense of, the Consent Holder of any devices required to measure the volume or flow rate or Characteristics of any Trade Waste being discharged from the Premises, and for the calibration and/or validation of such devices;
 - x. The provision and maintenance, at the Consent Holder's expense, of such services, (electricity, water, compressed air or otherwise), which may be required to operate meters and similar devices;
 - xi. At times specified, the provision in an Approved format of all flow and/or volume records, on-line monitoring readings, results of analyses (including Pre-Treatment by-products, e.g. Wastewater sludge disposal) and calibration/validation records;
 - xii. The provision and implementation of a Management Plan;
 - xiii. Risk assessment of damage to the environment due to an accidental discharge of a chemical;
 - xiv. The investigation of waste minimisation and Cleaner Production techniques;
 - xv. Remote monitoring or control of discharges and associated control, telemetry or SCADA systems;

- xvi. Third party treatment, carriage, discharge or disposal of by-products of Pre-Treatment of Trade Waste (including Wastewater sludge disposal);
 - xvii. The provision of a bond or insurance in favour of Council where failure to comply with the consent could result in damage to the Wastewater System, the Wastewater Treatment Plants, or could result in Council being in breach of any statutory obligation or resource consent;
 - xviii. Specific discharge related capital costs Council would incur for altering the Wastewater System and or Wastewater Treatment Plant in order to accommodate the discharge; and
 - xix. Specific discharge related operational costs Council would incur for operating the Wastewater System and or Wastewater Treatment Plant in order to accommodate the discharge.
- b) A Conditional Consent may impose controls on a Trade Waste discharge by specifying Mass Limits for any Characteristic. Any Characteristic permitted by Mass Limit must also have its maximum concentration limited to the value scheduled unless Approved otherwise.
- c) When setting Mass Limit allocations for a particular Characteristic, Council may consider:
- i. The operational requirements of and risk to the Wastewater System, and risks to occupational health and safety, public health, and the ultimate receiving environment;
 - ii. Whether or not the levels proposed pose a threat to the planned or actual beneficial reuse of Biosolids or Wastewater sludge;
 - iii. Conditions in the Wastewater System near the Trade Waste discharge point and elsewhere in the Wastewater System;
 - iv. The extent to which the available industrial capacity was used in the last financial period and is expected to be used in the forthcoming period;
 - v. Whether or not the applicant uses waste minimisation and Cleaner Production techniques within a period satisfactory to Council;
 - vi. Whether or not there is any net benefit to be gained by the increase of one Characteristic concurrently with the decrease of another;
 - vii. Any requirements of Council to reduce the discharge of any Characteristic to the Wastewater System;
 - viii. How great a proportion the mass flow of a Characteristic of the discharge will be of the total mass flow of that Characteristic in the Wastewater System;
 - ix. The total mass of the Characteristic allowable in the Wastewater System, and the proportion (if any) to be reserved for future allocations; and
 - x. Whether or not there is an interaction with other Characteristics that increases or decreases the effect of either Characteristic on the Wastewater System, treatment process, or receiving water (or land).

8.8 Duration and Review

- a) Conditional Consents, Trade Waste Agreement granted under this Bylaw expire at the end of a term not exceeding 5 years. Shorter terms may be applied where, in the reasonable opinion of Council:
 - i. The applicant has a history of non-compliance with a previous Conditional

Consent or Trade Waste Agreement;

- ii. The flow or Characteristics of the discharge are uncertain; or
- iii. The flow or Characteristics of the discharge may change over time.

b) Approval Notices remain valid until:

- i. Cancellation under clause 8.14;
- ii. The discharge fails to comply with the physical and chemical characteristics defined in Schedule 1A of this Bylaw (including any amendments to Schedule 1A); or
- iii. In the reasonable opinion of Council, the discharge changes or is likely to change to such an extent that it becomes a Conditional or Prohibited Trade Waste.

c) Council may at any time during the term of a Consent, by written notice to the Consent Holder (following a reasonable period of consultation), vary any condition to such an extent as Council considers necessary.

Advisory note: A condition could be varied if technical matters associated with the discharge have changed, to meet any new resource consent imposed on the discharges from Council's Wastewater Treatment Plant or to comply with any other legal requirements imposed on Council.)

d) A Consent Holder may at any time during the term of a Consent, by written application to Council, seek to vary any condition of Consent, as provided for in clause 8.5 (a) of this Bylaw.

8.9 Accidents and Spills

a) A Person who discharges Trade Waste must inform the Council immediately upon becoming aware of any matter which may result in a breach of this Bylaw, including (but not limited to):

- i. Any accident;
- ii. Spillage;
- iii. A defect in the process discharging Trade Waste; or
- iv. A risk to the health and safety of the public or the environment;

b) A Person who reports an accident, spillage or defect as provided for in clause 8.9 (a) or the Consent Holder for a Premises must disclose any information that may contribute to:

- i. The restoration of the integrity of the Wastewater System,
- ii. The cleaning of any spillage; or
- iii. The determination of the risks associated with the Trade Waste.

c) In the event of any accident, spillage or defect referred to in clause 8.6 (a) from Premises where a Consent Holder has a Conditional Consent, Council may:

- i. Review the Consent under clause 8.8; or
- ii. Require the Consent Holder to review the contingency management procedures and resubmit the Management Plan to the Council for its Approval.

d) In the event of any accident, spillage or defect referred to in clause 8.9 (a) from Premises where a Consent Holder has an Approval Notice, Council may require the Consent Holder to apply for a Conditional Consent.

8.10 Pre-treatment Requirements

- a) Council may approve a trade waste discharge subject to the provision of appropriate Pre-treatment systems to enable the consent holder to comply with this Bylaw. Such Pre-treatment systems must be provided, operated and maintained by the person discharging, at their expense. Typical Pre-treatment requirements are provided for common Trade Waste Premises in Schedule 2.
- b) Refuse or garbage grinders and macerators must not be used to dispose of solid waste from Trade Waste Premises to the Wastewater System unless Approved by Council.
- c) Grease Traps must:
 - i. Have a functional capacity of no less than 500 litres;
 - ii. Be sized according to the greatest volume as specified in Table I contained in Schedule 2;
 - iii. Be cleaned out at least once every 6 months or more frequently as specified in Consent conditions. The frequency with which Grease Traps are required to be cleaned out may be determined through a visual inspection and/or sample testing from the device outlet by Council.
- d) Shared Grease Traps, such as those operated by a body corporate or food court, must be sized appropriate to the total inputs. This must be no less than a functional capacity of 500 litres for each connected Premises.
- e) A Consent Holder whose Premises has existing Grease Traps with a functional capacity of less than 500 litres must apply for a Conditional Consent unless they can demonstrate compliance with the physical and chemical characteristics set out in Schedule IA to Council's satisfaction.
- f) Alternative Grease Removal Systems must be:
 - i. Operated in accordance with the manufacturer's instructions;
 - ii. Serviced and/or cleaned out by a contractor Approved by Council as specified in Consent conditions;
 - iii. Sized according to manufacturer's recommendation; and
 - iv. May only be used with Council's Approval.
- g) The frequency with which Alternative Grease Removal Systems are required to be serviced and/or cleaned out in accordance with sub-clause 8.10 (f) may vary. This will be determined by Council after a visual inspection and/or sample testing from the device outlet.
- h) Alternative Grease Removal Systems which do not meet the requirements contained in this Bylaw must be replaced at the Consent Holder's expense.

8.11 Flow Metering

- a) Where flow and/or volume metering of any Trade Waste discharge is required as a condition of a Consent the Consent Holder is responsible, at their own expense, for the supply, installation, reading and maintenance of a meter. These devices are subject to the Approval of Council, but remain the property of the Consent Holder.
- b) Records of flow and/or volume must be available for viewing at any time by the Council, and must be submitted to Council at prescribed intervals by the Consent Holder in a format Approved by Council.

- c) Meters must be located in a position approved by Council that provides the required degree of accuracy and should be readily accessible for reading and maintenance. The meters must be located in the correct position according to the manufacturer's installation instructions.
- d) The Consent Holder must arrange for in situ calibration and verification of the flow metering equipment and instrumentation by an Independent Qualified Person and method Approved by Council upon installation, and at least annually after that, to ensure its performance. The meter accuracy should be $\pm 10\%$, but with no greater a deviation from the previous meter calibration than $\pm 5\%$. A copy of the independent certification of each calibration and verification must be submitted to Council.
- e) Should any meter be found to have an error greater than that specified in clause 8.11 (d) of this Bylaw, Council may make an adjustment in accordance with the results shown by such tests. The adjustment may be back-dated for a period at the discretion of Council, but not exceeding 12 months. The Consent Holder must pay or be credited a greater or lesser amount according to such adjustment.
- f) Where in the reasonable opinion of Council, a meter has been tampered with, Council (without prejudice to the other remedies available) may declare the reading void and estimate discharge as provided in clause 8.9(a) of this Bylaw.
- g) Measurement of flow and/or volume must be carried out by or on behalf of the Consent Holder in accordance with British Standard (BS)3680: Part 11A, BS 3680: Part 11B and BS 5728: Part 3, or another Council Approved methodology.

8.12 Estimating Discharge

- a) Where no flow meter or similar device is required or where no flow or sample results have been supplied by the Consent Holder, Council may estimate the discharge of trade waste for charging purposes based on:
 - i. The volume of water supplied to the Premises, taking into account the proportion of that volume which is estimated to be discharged to the Wastewater System;
 - ii. The flow or characteristics of the discharge measured by the Consent Holder at a previous time during similar operating conditions; and/or
 - iii. The flow or characteristics measured by Council during the most recent audit sample.

8.13 Sampling, Testing and Monitoring

- a) Council may undertake sampling, testing, monitoring and audit inspections to determine if:
 - i. A discharge complies with the provisions of this Bylaw;
 - ii. A discharge is to be classified as Permitted, Conditional, or Prohibited (refer to clause 8.1 of this Bylaw);
 - iii. A discharge complies with any condition of a Consent or Trade Waste Agreement including a management plan; and
 - iv. Trade Waste Consent charges are applicable to that discharge.
- b) Where monitoring of any Trade Waste discharge is required as a condition of a Consent to ensure compliance with other conditions of the Consent:
 - i. The Consent Holder must monitor the discharge of Trade Waste; and
 - ii. Council may independently monitor the discharge of Trade Waste.

- c) The Consent Holder is responsible for all costs of monitoring, sampling and testing.
- d) The taking, preservation, transportation and analysis of the samples must be undertaken by an Authorised Officer or agent of Council, or the Consent Holder in accordance with accepted industry standard methods or another methodology Approved by Council.
- e) Any sample analysis must use methods or procedures in accordance with, or validated against, the latest version of the AWWA Standard methods for the examination of "Water and Wastewater" or by such alternative method or procedure Approved by Council. Analysis must be undertaken by a laboratory accredited by IANZ, or a laboratory Approved by Council.
- f) The Consent Holder must provide to Council or an Authorised Officer the results of any sampling, analysis, flow measurements or other monitoring requirements such as Pre-Treatment system maintenance, within one Working Day of any request by Council.
- g) Where clause 8.9 does not apply, but there is non-compliance with the conditions of a Consent or a Trade Waste Agreement or where an anomalous result is obtained, the Consent Holder must report the results of the analysis to Council as soon as practicable and in all cases within three Working Days.

Review of Decisions

- h) If any Person is dissatisfied with any decision by an Authorised Officer made under this Bylaw, that Person may request in writing that the Council review any such decision. The request must be made no later than 20 Working Days after the decision by the Authorised Officer. The Councils decision is final.
- i) Nothing in this clause affects any right of appeal under the Local Government Act 2002.

8.14 Transfer or Termination

- a) A Trade Waste Consent must be issued in the name of the given Consent Holder. The Consent Holder must not, without Council Approval:
 - i. Transfer to any other party the rights and responsibilities provided for under this Bylaw, and under the Consent;
 - ii. Allow a Point of Discharge to serve another Premises, or the Private Drain to that point to extend by pipe, or any other means, to serve another Premises; or
 - iii. In particular and not in limitation of the above, allow Wastewater from any other party to be discharged at their Point of Discharge.
- b) Council may suspend or cancel any Consent at any time following not less than 20 Working Days (during which consultation has occurred) notice to the Consent Holder or Person discharging any Trade Waste:
 - i. For the failure to comply with any condition of the Consent or to maintain effective control over the discharge;
 - ii. For the failure to comply with the requirements of this Bylaw or a Consent in respect of the volume, nature or composition of Trade Waste being discharged;
 - iii. In the event of any breach of a Resource Consent held by Council issued under the Resource Management Act caused in whole or in part by the Trade Waste discharge;
 - iv. Failure to provide and when appropriate update a Management Plan as required for a Conditional Consent;
 - v. Failure to follow the Management Plan provisions;
 - vi. Failure to pay any Trade Waste charges;

- vii. If new information becomes available on the nature or Characteristics of the Trade Waste discharge; or
 - viii. If any other circumstances arise which, in the opinion of Council, render it necessary in the public interest to cancel the right to discharge.
- c) Further to clause 8.14 (b) of this Bylaw, any Consent may at any time be immediately suspended or cancelled by Council, on giving to the Consent Holder, written notice, if:
- i. They discharge any Wastewater with prohibited Characteristics as set out in Schedule 1B;
 - ii. Council is lawfully directed to withdraw or otherwise to terminate the Consent summarily;
 - iii. The discharge of Trade Waste is unlawful;
 - iv. If the discharge is, in the opinion of Council, a threat to the environment or public health;
 - v. In the event of any negligence which, in the opinion of Council, threatens the operation of the Wastewater System; or
 - vi. In the opinion of Council, the discharge puts at risk the ability of Council to comply with the conditions of a Resource Consent and/or requires identified additional treatment measures or costs to avoid a breach of any such Resource Consent.
- d) Council may require a Consent Holder, at their expense, to disconnect the Premises from the Wastewater System where:
- i. The Consent has expired;
 - ii. Council suspends or cancels a Consent; or
 - iii. The Consent Holder breaches clauses 7.2 (a) to (d).
- e) If the Consent Holder fails to comply with any such requirement to disconnect, Council may at the Consent Holder's expense, access the Premises in accordance with section 171 of the Local Government Act 2002 in order to disconnect it from the Wastewater System. Council may carry out such works as it considers necessary to prevent the further discharge of Trade Waste into the Wastewater System.

8.15 Transitional provisions

- a) Any application for a Consent made under Council's Trade Waste and Wastewater Bylaw 2016, for which a Consent has not been granted at the time of this new Bylaw coming into force, is deemed to be an application made under clause 8.5 of this Bylaw.
- b) Every existing Consent continues in force as if it were a Consent under this Bylaw until it reaches its expiry date, provided that no Consent runs beyond 31 August 2023. For the avoidance of doubt, Schedule 1A of this Bylaw applies to existing consents except to the extent that the consent conditions specifically provide for a different limit.
- c) Subject to clause 8.4 of this Bylaw, every existing duly executed Trade Waste Agreement between an Occupier and Council which is current at the date this bylaw comes into force continues on the same terms and conditions as if it was a Trade Waste Agreement issued under this Bylaw.
- d) Where an existing Trade Waste Agreement is silent as to its term, that agreement will be terminable on six months' written notice by Council and the Occupier shall be required to apply for a Consent or Trade Waste Agreement in accordance with this Bylaw.

- e) A Person who proposes to continue a discharge of Permitted Trade Waste who does not have an Approval Notice must apply for an Approval Notice within twelve weeks of this Bylaw coming into force.

9. Tankered Waste

- 9.1 Any Person wishing to discharge Tankered Waste into the designated wastewater site must hold consent under this Bylaw.
- 9.2 Applicants must apply to the Council for an approval notice to discharge tanker waste. This must be made using the prescribed application form and provide all information relating to the application as specified by the Council.
- 9.3 Processing an Application for Approval
 - a) On receipt of an application for an Approval Notice, Council may:
 - i. Require the applicant to submit additional information that Council considers necessary to make an informed decision.
 - ii. Require the applicant to submit a satisfactory Management Plan to Council's satisfaction; and/or
 - iii. Wherever appropriate, have the discharge investigated and analysed as provided in clauses 8.11 and 8.13 of this Bylaw at the applicant's cost.
- 9.4 Conditions of Approval Notice

Any Consent may be granted subject to such conditions that Council imposes in the approval notice and may include, but are not limited to:

- a) Tanker Waste will only be accepted during working hours on Working Days or as advised by Council.
- b) To prevent cross-contamination, between tanker loads. The tank must be washed before collecting a load for disposal in the Wastewater System.
- c) The Council may require an analysis of Tankered Waste to confirm its Characteristics.
- d) The Council may require the Consent Holder to obtain specialist advice on Pre-Treatment or acceptance.
- e) The cost of all discharge, audit/monitoring, sampling, analysis, and advice must be met by the Consent Holder.
- f) The consent holder must ensure that Tankered Waste is treated and managed in accordance with the consent conditions before disposal.
- g) The consent holder must ensure that all weekly tracking reporting is completed as specified per the conditions of the consent
- h) No discharge of tanker waste directly to wastewater ponds or wastewater network unless approved by Council or authorised agent.

Part 4:

10. Access

- 10.1 In accordance with section 171 of the Local Government Act 2002, an Authorised Officer may enter and inspect any land or building (other than a dwelling house) for routine inspection or monitoring or for post breach monitoring. The owner of the land or building must be given at least 24 hours' notice of the intended entry.
- 10.2 In accordance with section 172 of the Local Government Act 2002, an Authorised Officer may

enter and inspect any land for the purpose of detecting a breach of this Bylaw if the Authorised Officer has reasonable grounds for suspecting that a breach has occurred or is occurring on the land. Unless the giving of notice would defeat the purpose of entry, reasonable notice must be provided. Any entry into private land will comply with the statutory requirements of S171-176 of the Local Government Act 2002.

- 10.3 In accordance with section 173 of the Local Government Act 2002, in the event of a sudden emergency causing or likely to cause damage to property or the environment or where there is danger to any works or adjoining property, an Authorised Officer may enter occupied land or buildings with out any notice being provided.

11. Fees and Charges

- 11.1 In accordance with sections 150 and 151 of the Local Government Act 2002, Council may, by resolution using the procedures required by the Act, fix charges payable by Consent Holders and applicants for the purposes of:

- a) Administering this Bylaw;
- b) Administering Consent applications and Consents granted under this Bylaw;
- c) Recovering the cost of receiving, treating and disposing of Trade Waste by or on behalf of Council.

11.2 Payment

- a) Payment for the discharge of wastewater and related services shall be in accordance with the Council rates, development or capital works contributions as per the schedule of fees and charges prevailing at the time.
- b) The Council may recover unpaid wastewater rates in respect of the wastewater services as prescribed in the Local Government Act 2002 from the owner or occupier (or both) of the premises.

12. Breaches

- 12.1 It is a breach of this Bylaw to:

- a) Fail to comply with any requirement of this Bylaw;
- b) Fail to comply with any Defect Notice issued by an Authorised Officer pursuant to this Bylaw;
or
- c) Obstruct an Authorised Officer in the performance of their function under this Bylaw.

- 12.2 Any Consent Holder who incorrectly informs Council of the Characteristics or volume of Tankered Waste, or who discharges Tankered Waste other than in the prescribed location and in accordance with the Consent will be in breach of this Bylaw.

- 12.3 Council may physically prevent discharge to the Wastewater System in the case of a non-compliance with this Bylaw, a Consent or a Trade Waste Agreement.

- 12.4 An Authorised Officer may report breaches or imminent breaches to Waikato Regional Council and the Environment Protection Authority for further enforcement.

- 12.5 A Person is not in breach of this Bylaw if that Person proves that the act or omission complained of was necessary to:

- a) Save or protect life or health or prevent injury; or
- b) Comply with Council's obligations under the Health Act 1956 and any subsequent

amendments; or

- c) Prevent serious damage to property; or
- d) Avoid actual or likely damage to the environment.

provided the conduct of the Person was reasonable in the circumstances and the effects of the act or omission were adequately remedied or mitigated by the Person after the breach occurred.

13. Liability

- 13.1 The Council shall not be liable for any loss, damage or inconvenience which the customer (or any person within the premises) may sustain as a result of deficiencies, reduced level of service or interruptions to the wastewater system.

14. Breakage and Damage of the Wastewater System on Private Property

- 14.1 Where the wastewater system is on private land and the wastewater system is damaged, even if unintendedly, by build overs or private assets or private infrastructure, the Council is not liable for the cost of remedy or repair of the wastewater system. The owner of the private property whose build over or private asset or infrastructure that has aided in the damage to the wastewater system is liable and responsible for the cost of remediation and repair back to the original standard.

Stop Works

- 14.2 The Council or Authorised Officer may serve or issue a notice or order on the owner, occupier or other person where works have damaged or are likely to cause damage to any part of Council's wastewater infrastructure. Failure to comply with such notice or order constitutes an offence against this Bylaw. The stopped work is not to recommence until appropriate remedial work is carried out and an 'Approval to Recommence Work' authority is signed and issued by Council or Authorised Officer.

Advisory note: Negligent or willful damage to Council infrastructure is prohibited under section 232 of the Local Government Act 2002.

15. Remedial Works and Cost Recovery

- 15.1 In accordance with section 186 of the Local Government Act 2002, if an Authorised Officer serves a notice on the owner or Occupier requiring any works in connection with the Premises to comply with the requirements of this Bylaw, a Consent, or Trade Waste Agreement, Council or an Authorised Officer may carry out the works where the owner or Occupier fails to comply with the notice, either:
 - a) Within the time specified in the notice; or
 - b) Within 24 hours if the notice certifies that the work is urgent; or
 - c) If the owner or Occupier fails to proceed with the work with all reasonable speed.
- 15.2 In accordance with section 187 of the Local Government Act 2002, if an authorised officer serves a notice on any person under this Bylaw, and the person fails to take the steps within the time specified, then Council or any Authorised Officer is authorised to take the steps set out in the notice. The Council may recover the cost of doing the work, together with reasonable administrative and supervision charges.
- 15.3 In accordance with section 176 of the Local Government Act 2002, a person who has been convicted of any offence against this Bylaw is liable to pay to the Council the costs of remedying any damage caused in the course of committing the offence. The costs must be assessed by a District Court Judge and are recoverable summarily as if they were a fine.

15.4 Costs recoverable under clause 13.3 are in addition to any other penalty for which the person who committed the offence is liable.

16. Offences and Penalties

16.1 A person who breaches this Bylaw is liable, upon conviction, to penalties in accordance with to section 242 under the Local Government Act 2002.

17. General

17.1 Any notice, order or other document which is required by this Bylaw to be served or given or sent to any person shall be deemed to have been duly served given or sent if delivered to such person or left at his or her residence or workplace or posted to such person at his or her last known address.

17.2 Any resolution of the Council may be amended, rescinded, or reinstated by a further resolution of the Council.

This Bylaw was made pursuant to a resolution passed by the Waikato District Council on the XXXX

THE COMMON SEAL of WAIKATO DISTRICT COUNCIL was affixed in the presence of:

Mayor

Chief Executive

Schedule IA – Permitted Characteristics

The following tables set out general requirements and maximum concentrations for permitted trade waste and domestic wastewater.

Conditional Consents and Trade Waste Agreements may contain lower or higher concentration limits and/or Mass Limits to control the total mass of a substance discharged.

Table I - General Characteristics

Parameter	Requirement or limit	Commentary
Bio-chemical Oxygen Demand (BOD5)	1,000 g/m ³ or 5 kg/ day.	It is sufficient to comply with either the concentration limit or the mass limit. High BOD can overload treatment plants.
Chemical Oxygen Demand (COD)	2,000 g/m ³ or 10 kg/day.	It is sufficient to comply with either the concentration limit or the mass limit. High COD can overload treatment plants.
Colour	No waste shall have colour or colouring substance that causes the discharge to be coloured to the extent that it impairs Wastewater treatment processes or Council is at risk of breaching resource consent conditions relating to discharge to the environment.	Some coloured substances can be difficult to remove in the treatment process.
Emulsions of paint, latex, adhesive, rubber, plastic or similar	Must not cause blockages or interfere with the operation of the Wastewater treatment system including treatment process.	Emulsions will coagulate when unstable and can sometimes cause blockages in the Wastewater System or interfere with the operation of the treatment process.
Flow	Maximum daily total flow 5m ³ . Instantaneous flowrate 2.0 L/s.	The total flow should be measured over any 24 hour period. Trade waste discharges with a daily flow greater than 5m ³ will require a Conditional Consent.
Gross solids (non-faecal)	15mm maximum dimension.	Gross solids can cause blockages in the Wastewater System.

Parameter	Requirement or limit	Commentary
Oil and Grease	200 g/m ³ . (100 g/m ³ for Pokeno and Tuakau). No free or floating layer.	Oils and greases can cause blockages in the Wastewater System, adversely affect the treatment process, and may impair the aesthetics of the receiving environment.
pH	6.0 to 10.0.	Low pH can cause corrosion of the Wastewater System, generate odours which could cause a public nuisance; release toxic H ₂ S gas which could endanger workers.
Radioactivity	Must not exceed the Office of Radiation Safety Code of Practice CSPI for the Use of Unsealed Radioactive Material.	
Settleable Solids	50 ml/L.	Can cause blockages and overload the treatment process.
Solvents or other organic liquids	No free or floating layer.	Some organic liquids are denser than water and will settle in pipes and traps.
Suspended Solids	2,000 g/m ³ .	Can cause blockages and overload the treatment process.
Transmissivity	When diluted at 10:1 with distilled water and tested at 254nm, the result must have a transmissivity of 50% or more, equivalent to an absorbance of 0.3010 or less.	Poor transmissivity reduces the effectiveness of the UV light disinfection at treatment plants.
Temperature	40 °C.	High temperatures cause increased damage to structures, increase the potential for anaerobic conditions to form in the Wastewater, promote the release of toxic gases and can endanger workers. Conditional Consents may have a lower temperature limit.

Parameter	Requirement or limit	Commentary
Inhibitory Substances	Should any Characteristic of a discharge be found to inhibit the performance of the Wastewater treatment process, such that Council is at risk of breaching resource consent conditions, Council may limit the concentration of any inhibitory substance.	

Table 2 - Chemical Characteristics

Parameter	Limit g/m ³	Commentary
Ammonia (as N)	50	May endanger workers; significantly contribute to the nutrient loading on the receiving environment.
Ammonium salts	200	May endanger workers; significantly contribute to the nutrient loading on the receiving environment.
Anionic Surfactants as methylene blue active substance (MBAS)	300	High MBAS can adversely affect the efficiency of activated sludge plants, cause foaming and impair the aesthetics of the receiving waters.
Boron	25	Boron is not removed by conventional Wastewater treatment.
Bromine as Br ₂	5	High concentrations could affect the health and safety of workers.
Chlorine (Cl ₂ free chlorine)	3	Can endanger workers, cause corrosion of the Wastewater collection system.
Cyanide as CN ⁻	1	Can produce toxic atmospheres and endanger workers.
Dissolved aluminium	100	Aluminium compounds, particularly in the presence of calcium salts, have the potential to precipitate as a scale, which may cause a blockage.
Dissolved iron	100	Iron salts may precipitate and cause a blockage. High concentrations of ferric iron may also present colour problems depending on local conditions.
Fluoride as F	30	Not removed by conventional Wastewater treatment.
Hypochlorite	30	Can endanger workers, cause corrosion of the Wastewater collection system.
Kjeldahl nitrogen	150	May significantly contribute to the nutrient load discharged to the receiving environment.
Sulphate (measured as SO ₄)	500. (200 for Pokeno and Tuakau).	May adversely affect Wastewater System, may increase the potential for the generation of sulphides.
Sulphite (measured as SO ₂)	15	Can endanger workers, cause corrosion of the Wastewater collection system.
Sulphide (as H ₂ S on acidification)	5	May cause corrosion of Wastewater System, particularly the non-wetted part of the Wastewater pipes; generate odours which could cause a public nuisance; release toxic H ₂ S gas which could endanger workers.
Total Phosphorus as P	50	May significantly contribute to the nutrient load discharged to the receiving environment.

Table 3 - Heavy Metals

Heavy metals can inhibit Wastewater treatment process and restrict the reuse of Biosolids. Mass Limits may be imposed – refer to clause 8.4 (b) of this Bylaw.

Parameter	Limit g/m³
Antimony	5
Arsenic	5
Barium	5
Beryllium	0.005
Cadmium	0.5
Chromium (Total)	5
Cobalt	5
Copper	5
Lead	5
Manganese	5
Mercury	0.005
Molybdenum	5
Nickel	5
Selenium	5
Silver	2
Thallium	5
Tin	5
Zinc	5

Table 4 - Organic Compounds

Organic compounds can endanger sewer workers and treatment processes.

Parameter	Limit g/m ³
Acetone	100
Benzene	1
Butanone	100
Chlorinated phenols	0.02
Ethylbenzene	5
Ethylene Glycol	50
Formaldehyde	30
Halogenated aliphatic compounds	1
Halogenated aromatic hydrocarbons (HAH's)	0.002
Organophosphate pesticides	0.1
Pesticides (includes insecticides, herbicides, fungicides and excludes organophosphate, organochlorine and any other pesticides not registered for use in New Zealand)	0.2 in total
Phenolic compounds (as phenols) excluding chlorinated phenols	50
Polybrominated biphenyls (PBBs)	0.002
Polychlorinated biphenyls (PCBs)	0.002
Polycyclic (or polynuclear) aromatic hydrocarbons (PAHs)	0.05
Total Petroleum Hydrocarbons	
C7 - C14	30
C7 - C36	50
Tri-methyl Benzene	5
Toluene	5
Xylene	5

Table 5 - Liquid Waste from Pharmacies

Pharmacies must not discharge more liquid pharmaceutical waste per month than the volumes listed below. The volume limit is based on the concentration of active ingredients in the product.

Volume Limit	Active Concentration
10 Litres	125mg/5ml
5 Litres	250mg/5ml
3 Litres	Above 250mg/5ml

Schedule 1B: Prohibited Characteristics

This schedule provides the meaning of prohibited trade waste other than mortuary waste. Prohibited trade waste must not be discharged into the public wastewater system.

Prohibited Trade Waste has or is likely to have any of the prohibited Characteristics set out below. Prohibited Characteristics are present if their concentration exceeds background levels. The background level in relation to any substance means the extent to which that substance is present (if at all) in the municipal water supply used on the Premises, or in any other water supply that is Approved by Council for the purpose of discharging waste.

Prohibited Characteristics

1. Any discharge has prohibited Characteristics if it has any solid, liquid or gaseous matters, or any combination, or mixture of such matters which by themselves or in combination with any other matters will immediately or in the course of time:
 - a) Interfere with the free flow of Wastewater in the Wastewater System; or damage any part of the Wastewater System;
 - b) In any way, directly or indirectly, cause the quality of the effluent or Biosolids and other solids from any Wastewater Treatment Plant to breach the conditions of a permit issued under the Resource Management Act 1991, or water right, permit or other governing legislation;
 - c) Prejudice the occupational health and safety of any Person or people;
 - d) After treatment be toxic to fish, animal or plant life in the receiving waters;
 - e) Cause malodorous gases or
 - f) Contains substances that cause the discharge of any Wastewater Treatment Plant to receiving waters to be coloured.
2. A discharge has a prohibited Characteristic if it has any amount of:
 - a) Harmful solids, including dry solid wastes and materials which combine with water to form a cemented mass;
 - b) Dry solids, solids longer than 30mm, fibrous material, sheet films, and anything which may react to form a solid mass;
 - c) Except as allowed for in Schedule 1A, liquid, solid or gas which could be flammable or explosive in the wastes, including oil, fuel, calcium carbide and any other material which is capable of giving rise to fire or explosion hazards either spontaneously or in combination with sewage;
 - d) Asbestos;
 - e) The following organo-metal compounds:
 - i. tin (as tributyl and other organotin compounds); or
 - ii. chromium (as organic compounds);
 - f) Genetic wastes, being all wastes that contain or are likely to contain genetically altered material from Premises where the genetic alteration of any material is conducted;
 - g) Any health care wastes covered by NZS 4304 or any pathological or histological wastes;
 - h) Radioactivity levels not compliant with the Office of Radiation Safety Code of Practice CSPI for the Use of Unsealed Radioactive Material; Any pharmaceutical liquid waste containing cytotoxic ingredients. Cytotoxic waste means
 - i) waste that is contaminated by a cytotoxic drug.
