

SCHED3 – Sites and areas of significance to Maaori

Overview

- (1) The majority of archaeological sites are pre-1900 Maaori sites. They are recorded by archaeologists for their archaeological features and values. Maaori did not record these sites, but they recognise them today for their whakapapa, holistic and cultural values.
- (2) The following sites, particularly paa, include archaeological sites from New Zealand Archaeological Association records. They are recognised for their significant value to Maaori and represent the pre-1900 Maaori settlement pattern as markers for association of places.
- (3) The schedule also includes parcels of land that have been identified in Part 8 of the Schedule to the 2009 Deed of Settlement between the Crown and Waikato-Tainui as being culturally significant to Waikato-Tainui Iwi, and parcels of land that have been identified as areas that have significant value to Maaori.
- (4) For the sites and areas listed below, the rules of the District Plan apply only to the extent shown on the planning maps.
