- RPZ-P9 Stormwater management.
- Stormwater management systems shall be designed to minimise the erosion potential and rate of run-off into the coastal marine area.
- RPZ-P10 Stock exclusion.
- Stock should be excluded from steep slopes and gully systems to the extent compatible with maintaining a sustainable farming operation in the Balance Lot (Farm Management).
- RPZ-P11 Environmental improvement.
- (1) Gully systems and stream margins should be planted and managed to maintain and enhance natural ecosystems, contribute to land stability and restore habitat for indigenous flora and fauna.
- (2) Planting and management of gully systems and stream margins will result in net environmental gain.
- RPZ-P12 Landscape values.
- (1) Planting on steep slopes should be encouraged and designed to protect and enhance the landscape values on the peninsula.
