

## HAZS – Hazardous substances

*The relevant area specific zone chapter provisions apply in addition to this chapter.*

### Overview

The use of hazardous substances in New Zealand is primarily managed by the Hazardous Substances and New Organisms Act 1996 (HSNO Act), the Health and Safety at Work Act 2015 (HSW Act) and relevant regulations.

Because the District Plan seeks to avoid duplication of requirements and obligations that arise under other legislation and regulations, the provisions of this chapter are designed to manage the effects of use, storage, or disposal of hazardous substances, only to the extent that those effects are not within the ambit of existing legislation and regulations.

### Objectives

HAZS-O1 Manufacture, use and storage of hazardous substances.

To protect the community and natural environment from the adverse effects associated with the manufacture, use and storage of hazardous substances.

HAZS-O2 Use of hazardous substances.

To enable activities to utilise hazardous substances where necessary for their operations, in appropriate locations.

### Policies

HAZS-P1 Reverse sensitivity. **{000042, 000087}**

Ensure that activities are able to utilise hazardous substances in compliance with relevant regulation as necessary to their operation, without being compromised by 'reverse sensitivity' (that is, by residential or other sensitive activities moving closer and seeking higher amenity levels, including reduced risks from hazardous substances).

HAZS-P2 Significant hazardous facilities.

Ensure that significant hazardous facilities are appropriately sited and managed in order to reduce risks to the environment and community to acceptable levels.

HAZS-P3 Duplication of regulation.

Avoid any unnecessary duplication of regulation between the Hazardous Substances and New Organisms Act 1996, the Health and Safety at Work Act 2015 and relevant regulations, and the District Plan.
