

SCHED I – Historic heritage items {000032}

Assessment of Historic Buildings and Structures

Heritage Assessment Criteria

- (1) The heritage significance of an item determines whether it has either a local, district and national or context. Heritage values are used to establish a 'Statement of Significance' that provides evidence to determine the level of heritage significance an item has. The 'Statement of Significance' for each Historic heritage item in SCHED I – Historic heritage items is contained in the Waikato District Council Historic Heritage Item Record. These records are contained in the Waikato District Heritage Inventory.
- (2) The heritage reports examine an item's significance against the heritage qualities from the Waikato Regional Policy Statement; it also identifies the geographical boundaries ('Extent of Setting') for an item. 'Extent of Setting' is identified in SCHED I – Historic heritage items and notated on the planning maps.
- (3) Relevant heritage values and the level of heritage significance of the scheduled historic heritage items is based on an evaluation of the items against the following heritage qualities:
 - Archaeological**
 - (4) The potential of the building, structure and setting to define or expand the knowledge of earlier human occupation, activities or events.
 - (5) The potential for the building, structure and setting to provide evidence to address archaeological research.
 - (6) The building, structure and setting is registered by Heritage New Zealand Pouhere Taonga, or recorded by the New Zealand Archaeological Association Site Recording Scheme.
 - Architectural**
 - (7) The style of the building or structure is representative of a significant development period in the Waikato District and associated with a significant activity (e.g., institutional, industrial, commercial or transportation).
 - (8) The building or structure has distinctive or special attributes of an aesthetic or functional nature (e.g., materials, detailing, functional layout, landmark status or symbolic value);
 - (9) The building or structure uses unique or uncommon building materials or demonstrates an innovative method of construction, or is an early example of the use of particular building technique.
 - (10) The building or structure's architect, designer, engineer or builder as a notable practitioner or made a significant contribution to Waikato District.
 - Cultural**
 - (11) The building, structure and setting is important as a focus of spiritual, political, national or other cultural sentiment.
 - (12) The building, structure and setting is a context for community identity or sense of place and provides evidence of cultural or historical continuity.

Part 4: Schedules and appendices / SCHED I – Historic heritage items

- (13) The building, structure and setting has symbolic or commemorative significance to people who use or have used it, or to the descendants of such people. The interpretative capacity of the place or area and its potential to increase the understanding or past lifestyles or events.

Historic

- (14) The building or structure has a direct association with, or relationship to a person, group, institution, event, or activity that is of historical significance to Waikato District.
- (15) The building or structure is associated with broad patterns of local or national history, including development and settlement patterns, early or important transportation routes, social or economic trends and activities.

Scientific

- (16) The potential for the building, structure and setting to contribute information about an historic figure, event, phase or activity.
- (17) The degree to which the building, structure and setting contributes information and the importance of the data involved, its rarity, quality or representativeness.

Technical

- (18) The building or structure shows a high degree of creative or technical achievement at a particular time or is associated with scientific or technical innovations or achievements.

Ranking of Historic Heritage Items

- (19) The ranking used in SCHED I – Historic heritage items has been determined by an individual item's level of significance to the Waikato District.

A Ranking:

- (20) Historic buildings and structures with one or more criterion from the qualities have been determined to have a 'high level' of significance; the item is important to understand Waikato District's development and identity; and the item has a high degree of integrity.

B Ranking:

- (21) Historic buildings and structures with one or more criterion from the qualities; the item contributes to the understandings of Waikato District's development and identity, and the item has a good degree of integrity.

Advice Notes:

- (1) All exteriors of the scheduled historic heritage items are protected. Any exceptions are notated in SCHED I – Historic heritage items.
- (2) The 'Extent of Setting' provides the context when considering effects pertaining to the setting of an item under the zone provisions. The 'Extent of Setting' is either identified as being the title boundary of the heritage item or, a specifically identified area surrounding the item. When the 'Extent of Setting' does not align with the legal boundaries as identified by the Record of Title, the area is identified on the planning maps.
- (3) The information contained in SCHED I – Historic heritage items is the not a comprehensive or exclusive record of an item. Detailed information, including the individual Waikato District Council Historic Heritage Item Record for each item is

contained in the Waikato District Heritage Inventory. Absence of any reference to a feature of a scheduled item does not indicate that the feature is of no interest and can therefore be altered or removed without consent.

- (4) The Waikato District Heritage Inventory provides information on an item's significance, a description of the item's setting, and in some instances pictorial evidence. However, it does not form part of any rule in the District Plan.
- (5) Reference should be made to the Waikato District Heritage Inventory when considering works to a scheduled heritage item or within the 'Extent of Setting' of an item. The heritage reports will assist with assessing the effects of development proposals (land use and subdivision) on the heritage values of a scheduled historic heritage item.
- (6) The Waikato District Heritage Inventory is a living document and will be updated and revised from time to time as additional information becomes available. This does not affect the listing of items in the District Plan

SCHEDI – Historic heritage items

ID	Heritage item	Address	Property number	Ranking	HNZPT list classification	Summary of heritage significance	Extent of setting
Tuakau							
1	Former Pukekohe Police Station Lock-up (1887)	156 Jericho Road, Buckland	301794	B	-	<ul style="list-style-type: none"> • Standardised Public Works Department design • Association with policing in Pukekohe • Example of late 1880s construction that met police security requirements 	Refer to planning maps
