1.0 Purpose of this plan

Reserve management plans provide direction for the day-to-day management of reserves.

Determining community preferences and establishing the best means to provide for them are essential ingredients of good management planning. A management plan provides the community with certainty about the function and management of each reserve that is managed by Council. It also helps ensure that management decisions are consistent with the principles of the Reserves Act 1977.

This plan will provide for consistent approach to the management of reserves in the Waikato district.

1.1 Reserve management plan requirements

The Waikato District Council (the Council) has a responsibility as an administering body under the Reserves Act 1977, Section 41, to prepare management plans for the reserves and parks that it manages.

These management plans should "... provide for and ensure the use, enjoyment, maintenance, protection, and preservation ... and, ... the development, as appropriate, of the reserve for the purpose for which it is classified".

Open space is recognised as an important component of the urban environment, providing opportunities for recreation and leisure. This management plan provides a framework within which managers can develop a balanced response to current opportunities and address future pressures.

The management plan identifies clear objectives and establishes directions for planning, resource management and maintenance of public open space. It clarifies and establishes policy and direction for both Council staff and the public.

When adopted, this management plan and the General Policies Management Plan 2015 will replace any previously prepared reserve management plan for reserves included in this plan.

This management plan will be kept under continuous review to ensure that the policies are appropriate and relevant for the communities within the Waikato district. It is intended that a comprehensive review will take place every five years.

1.2 Relationship with general policies

This management plan is to be read in conjunction with the General Policies Reserve Management Plan. The general policies will apply to all reserves within the Waikato district. Where there is a conflict between the specific policies contained within this plan and the general policies contained within the General Policies Reserve Management Plan, the specific policies in this plan will take precedence.

1.3 Relationship with strategies

Council has other strategies that impact neighbourhood parks, including the Playground Strategy, Signage Strategy and Toilet Strategy. Whereby these strategies have identified policies for neighbourhood parks it is the intention that these will be implemented. These policies may relate to issues such as maintaining and upgrading playgrounds, installing park signage and upgrading public toilets. To avoid repetition these policies have not been repeated in this document.

1.4 Waikato-Tainui Joint Management Agreement

Council and Waikato-Tainui have entered into a Joint Management Agreement in accordance with the Waikato-Tainui Raupatu Claims (Waikato River) Settlement Act 2010. The agreement acknowledges that Council has rights and responsibilities with regard to management of reserves under Reserves Act 1977.

The agreement also acknowledges that Council has a requirement to consult to determine appropriate management of Crown land under Council control and to consider how management decisions that may impact on future return of the land to Waikato-Tainui.

In accordance with the Waikato Raupatu Claims Settlement Act 1995, Council has informed the Waikato Raupatu River Trust of its intention to prepare a reserve management plan and has discussed the scope of the reserve management plan. The Waikato Raupatu River Trust will provide Council with feedback on how the draft plan and submissions received may affect customary activities on the Waikato River.

The Council is the administrator of many reserves where the underlying ownership resides with the Crown. In accordance with the Waikato Raupatu Claims Settlement Act 1995, Waikato-Tainui will be offered first right of refusal where Crown land is to be disposed of. Where reserves are subject to first right of refusal provisions, this is identified in the property summary for each reserve.

Where the land was derived from the Crown, and therefore subject to the Waikato-Tainui Treaty Settlement, this is shown as a "Subject to WTTS".

1.5 Structure of this plan

The reserves covered by this management plan are presented on a ward-by-ward basis. Each reserve is described with respect to its classification and legal description and the authority under which the Council manages it.

Council's authority to administer the reserve may either come from:

1. Ownership (in such cases the land will have been "declared" reserve under Section 14 of the Reserves Act or "vested" on subdivision under the Resource management Act or Local Government Act)
2. A "vesting" from the Crown, or

3. "An appointment to control and manage" from the Crown

Where the land was derived from the Crown, and therefore subject to the Waikato-Tainui Treaty Settlement, this is shown as a "Subject to WTTS".

The current formal occupation and use of the reserve is described and the specific issues and policies that apply to the reserve are outlined. A plan showing the boundaries of the reserve is included and where required a more detailed concept plan is included showing future development.

A number of properties are not reserve or are not yet classified in accordance with the Reserves Act 1977. The treatment of these properties is described in Section 3.

1.6 Council and delegations

The Minister of Conservation has delegated a number of procedural and decision-making responsibilities to Council under the Reserves Act 1977. These delegations are made to "Council as a whole" and cannot be delegated to committees of Council or staff. Such decisions that must be made by a meeting of the full Council (Council as a whole) include adoption of reserve management plans, classification of reserves and granting of leases.

Other decisions, such as approval for events, removal of trees, issuing of permits etc. can be delegated from the Council to the Chief Executive and to the Parks and Facilities staff. As delegations change from time to time, the term Council is used throughout the document. Staff should refer to the Delegations Manual to determine if they have the authority to make decisions in accordance with the policies in this management plan.

1.7 Implementation

This management plan provides objectives and policies that determine the appropriate use, protection and development of the reserves administered by the Council. Decisions relating to the funding and priority for works described in this plan will be undertaken within Council's Long Term Plan and Annual Plan. Inclusion of any project within this management plan does not indicate Council funding will be available for such works as works may be funded and delivered by parties other than Council.

1.8 Public suggestions

Suggestions from members of the public have been incorporated in to the individual management plans within this document. However, in some cases suggestions have been made that relate to multiple neighbourhood parks. These suggestions are supported and are discussed below.

Whaingaroa Environment Centre – fruit trees

The Whaingaroa Environment Centre has been involved in assisting the Raglan community with their aspiration to see more free food available in public places. Having fruit trees in Raglan's neighbourhood reserves was an idea brought forward from the community, and

supported by the community through the donation of fruit trees, compost and mulch and through the planting of the trees.

The Centre approached the Waikato District Council who has supported this community initiative, providing access to mulch and identifying suitable areas for fruit trees. The Centre would like to see the community aspiration for fruit trees in public spaces formally catered for in the Neighbourhood Parks Reserve Management Plan. This has also been allowed for in Council's Tree Policy.

Smoke free parks

There were a number of suggestions advocating smoke free parks. Council already has a policy within its General Policies Reserve Management Plan that all reserves shall be smoke free. Council will consider initiatives to further promote this such as signage at reserves and communication plans.

Heritage studies

Heritage New Zealand advocates a historic heritage study of each reserve as a helpful way to achieve an understanding of the historic heritage values. Council has a policy within its General Policies Reserve Management Plan to recognise and retain heritage features.

Transpower National Grid transmission lines

Transpower seeks that the Management Plan recognises Transpower's existing assets within the reserves *and* enables the ongoing operation, maintenance, development and upgrade of the National Grid transmission lines within the proposed reserves. Council has a policy within its General Policies Reserve Management Plan to enable this.

2.0 The reserves

2.1 Awaroa ki Tuakau Ward

2.1.1 Centennial Park, Tuakau

Reserve Classification	Recreation Reserve	Area	1.1720 ha
Location	Bollard Road and Park Ave, Tuakau	Legal description	Part Lot 1 DP 13796, Lots 9-12 and Part Lot 13 DP 16549 and DP 25648
Authority	Declared	Subject to WTTS	No

Background

This large neighbourhood park includes a playground, established trees, picnic tables, park benches and a large grass area on a gradual slope. Bollards and chains surround the road entrances and the reserve is allocated as a dog exercise area. The Kairoa stream passes through the Eastern portion of the reserve. There are a variety of trees and gardens around the stream, as well as a walking path.

A bridge over the Kairoa stream at the Eastern edge of the reserve was officially opened by His Worship the Mayor Allan Sanson in 2014 and sponsored by the Graham family.

There are plaques by the Western entrance that state: “1840 – 1940 Erected by the people of Tuakau and the surrounding district and in honour dedicated to the memory of those pioneer men and women who having endured dangers and great hardship won for us our heritage”.

Access is given through the reserve for maintenance of the main network lines.

Reserve Issues

- Ensure that consideration is given to railway safety. This can occur with options such as the use of fencing and/or landscaping buffers, and locating buildings away from the rail boundary, as potential means of managing the risk associated with the rail network adjoining public open space.
- Ensure trees are kept away from railway line.
- Whilst there is signage by the carpark, it is not easily viewable.

Reserve Management Policy

- I. Consider urban design principles to further buffer the railway line from the reserve.

Background

This is a scenic and peaceful reserve with a large flat grass area, playground and established trees on the upper level. 3.0 Land other than reserve

The following properties are managed for neighbourhood park purposes by the Council but have either not been declared reserve or have not been classified under the Reserves Act 1977.

The Reserves Act 1977 requires that an administering authority (the Council) classify all reserves prior to public notification of a reserve management plan.

As such the following properties do not form part of this reserve management plan. The Council has instead elected to include them outside of the reserve management plan for completeness. It is the Council's intention that it will apply the policies outlined below in its decision-making under the Local Government Act 2003 when considering the management and development of these properties.

It is the Council's intention that it will declare the following properties reserve and classify them in the future. They will then be included within the General Policies and Neighbourhood Reserves Management Plan in subsequent reviews of those management plans.
